

Flow

## Seamlessly manage electronic prescriptions

Seamlessly blend your existing paper prescription workflow to manage new electronic prescription workflow

**MedView Flow** is a pharmacy workflow management tool that brings paper and electronic prescriptions into the one electronic queue. Developed to ensure all Australian pharmacies can embrace the change to ePrescriptions with confidence and continue to provide efficient and safe care, regardless of whether patients present their script electronically or via paper.

**MedView Flow** offers patient flexibility with options to submit their ePrescriptions directly to your pharmacy queue, anywhere, anytime.

**MedView Flow** is cloud-based and can be used with any dispensing software. To find out more visit [www.medview.com.au/flow](http://www.medview.com.au/flow)
